

OBJECT ORIENTED PROGRAMMING USING C++

Time: 30 Minutes
Maximum Marks: 20

Instructions

1. Part A is compulsory.
2. Answer ALL questions in Part A.
3. Answer ANY TWO questions from Part B.
4. Each question carries the marks indicated against it.
5. If more than two questions are answered in Part B, only the first two attempted answers will be evaluated.

PART A ($5 \times 2 = 10$ Marks)

Q1. Define Encapsulation. (2 Marks)

Q2. What is Inheritance? (2 Marks)

Q3. What is a Constructor? (2 Marks)

Q4. What is Polymorphism? (2 Marks)

Q5. What is Data Abstraction? (2 Marks)

PART B (Answer Any TWO) ($2 \times 5 = 10$ Marks)

Q6. Explain Inheritance with a suitable example. (5 Marks)

Q7. Explain the advantages of Encapsulation in Object-Oriented Programming. (5 Marks)

Q8. Differentiate between Compile-Time Polymorphism and Run-Time Polymorphism with suitable examples. (5 Marks)

Total Marks: 20
